API Complete Model

Start

Create Experiment

```
User:
"experiment_name": string,
"experiment_type": string,
.....
Designer:
"experiment_id: id,
...
```

D: An error occurred in the parameter "xpto". Modify and run again

Create Data

```
User:
"input_path": string,
"output_path": string,
"train_slices": string,
"valid_slices": string,
.....
Designer:
...
```

async
U: Execute Create Data

D: Use the function below to check if the Train Model processing has finished

D: Data processor not found
